Subject: ANIMAS PROBLEM

Message: would like to help! Born in Albuq. want to assist in restoration. Have 38 years experience in drilling and 4 years experience in underground mining. Degrees from University of Arizona in Watershed Management/Hydrology B.S also Accounting/Finance B.S. Was planning retirement to be back in Chama/ Pagosa Springs area. , Called your office and they did return my call. However I was on a drilling rig near Laredo Texas. I can assist you from the point of origin in Eureka Colorado to the potential contamination of the Animas/San Juan and beyond. This is personal to me as my grandparents and my dad lived in Eureka/Silverton where granddad was mining engineer , and probably worked the many gold mines in area. As you might have seen I am still currently working in the oil business. Past employers were Halliburton, Schlumberger,

Baker-Hughes, and Dow Chemical. Mining experience was with Newmont Mining and its subsidiary Cementation Company of America. Let me know to whom I might contact if I may be of assistance. Money is no longer an issue in my life , getting this right is. Good luck to you and your staff Suzanna Martinez, you are a beacon of hope , not only to the great state of New Mexico , but perhaps to this nation in future years. Thanks Doug Paddison .
